

# Footwear Safety

---

## Stay safe with appropriate foot protection.

- Footwear must support ankles and arches, and be slip-resistant.
- Ankle support is important during work on uneven surfaces.
- Slip resistance is a vital feature of safe footwear.
- Arch support reduces foot pain during work on concrete floors.
- Metatarsal and toe protection helps prevent crush injuries.
- Shoe soles should provide traction like a snow tire.
- Wear slip-on ice cleats when working in ice or snow.
